February 20, 2020

Dear Comore Loma Water Residents,

The Board of Directors, would like to remind everyone again, that Comore Loma Water recommends that you have a Water Pressure Regulator installed in your home, due to the fluctuations of water pressure thru the water system.

Many of you have these installed in your home already, as per plumbing code:

**608.2 Excessive Water Pressure.**

Where static water pressure in the water supply piping is exceeding 80 psi (552 kPa), an approved-type pressure regulator preceded by an adequate strainer shall be installed and the static pressure reduced to 80 psi (552 kPa) or less.—2016 National Plumbing Code

Please remember that the Water Corporation also recommends that you have sand filter installed on your property.

We also want to remind you that you should have them checked regularly to make sure they are working properly. If you have any questions please feel free to contact us.

Comore Loma Water Corporation

**Board of Directors:**

Todd Cornelison, President  
Marvin Besmer, Director  
Glenn Wright, Director

Casey Peterson, Secretary  
Randy Skidmore, Director

Bill Windels, Treasurer  
Brad Streeper, Director
